

Ginés López Montalbán

Design Engineer · Product Design & Frontend

Email: gines.lopez@gmail.com · Phone: +34 658 595 047 · LinkedIn: linkedin.com/in/gines-lopez-design · GitHub:

github.com/gineslm · Location: Valencia, Madrid or Barcelona (hybrid)

Specialisms: Design Systems · UX/UI · Frontend Development · AI-assisted workflows

PROFESSIONAL PROFILE

Designer and Frontend Engineer with over 6 years of experience in digital product, UX/UI and frontend development, built on a previous 15+ year career in graphic design and visual communication. I translate complex problems into product experiences, Design Systems and maintainable frontend implementations, and have led frontend architecture and component systems for several products.

CORE EXPERIENCE

Laberit — Frontend Developer & UX/UI Analyst

Valencia · November 2025 — present

- Design and development of a cross-product library of reusable components, tools and resources with Angular 18 and Ionic 8 for hybrid web and mobile applications.
- Implementation of the Design System and WCAG 2.1 AA accessibility criteria inside the library, centralising tokens, components, behaviours and documentation for consuming applications.
- Frontend architecture with Angular Signals, oriented towards reactive state and component reuse.

Romeu IT — Frontend Analyst Programmer & UX/UI Analyst

Valencia · October 2020 — March 2024

- Frontend and UX/UI lead across three corporate applications built with Angular and Ionic, defining shared criteria for architecture, structure and reuse.
- Frontend architecture based on reusable components, lazy loading, DTOs, integration contracts and REST API consumption.
- Cross-functional UX/UI role between product and engineering: flows, interface patterns, wireframes and high-fidelity Figma prototypes.
- Design and evolution of a corporate Design System, consolidated as the shared standard across products.

APPLIED RESEARCH

Design-to-Code and human-AI collaboration · Warp

Personal project · 2026 · github.com/gineslm/design-to-code · github.com/gineslm/warp

- Research into delegating the definition → design → frontend implementation flow to AI agents, with real design → code tests on Angular; a staged methodology based on traceability, versioning and validation gates identified the design → code specification contract as the main bottleneck.
- Development of Warp, a Git-based knowledge architecture for persistent responsibilities, interchangeable agents, explicit documentary authority and automatic structural validation, contrasted with DDD / Bounded Contexts, Data Mesh, ADR/RFC, W3C PROV and Team Topologies.

ADDITIONAL EXPERIENCE

Vértice Elearning — Trainer in Web Design, Usability and Accessibility

Málaga / remote · November 2024 — October 2025. Remote training in web design, usability and digital accessibility for Junta de Andalucía programmes.

Elora Design — Frontend Developer & UX/UI Designer

Murcia · September — December 2019. App design and implementation with Angular and Ionic; UX analysis and prototyping for Imoles, an AI project applied to medical diagnosis.

Prodesign · ATYF · Dislomar — Senior Graphic Designer, Art Direction and Web Development

Murcia / Madrid / Valencia · 2000 — 2019. Over 15 years in graphic design, corporate identity, branding and art direction, moving progressively into digital and web.

CAPABILITIES

Product Design & Design Engineering: Product Design · UX/UI · Design Systems · Interaction Design · Information Architecture · Accessibility · Component Design · Design-to-Code workflows

Frontend Engineering: Angular · Ionic · TypeScript · JavaScript · HTML5 · CSS3 / SASS · RxJS · Angular Signals · REST APIs · OpenAPI / Swagger

Architecture & Quality: Frontend Architecture · Reusable Component Systems · Git · Cypress E2E · SonarQube · ESLint · Docker · SOLID · WCAG 2.1 AA

Human-AI & Systems: Human-AI workflows · Agent-assisted development · Context Design · Knowledge Architecture · Process Design

EDUCATION, CERTIFICATION AND LANGUAGES

MA in Contemporary Philosophical Thought — Universitat de València · 2008—2010

BA in Fine Arts, Sculpture and Audiovisual Media — Universitat Politècnica de València · 2002—2007

Diploma in Design and Graphic Arts — Fundación Casa de la Moneda, Madrid · 1998—2001

Professional Certification IFCD0210 — Web Technologies Application Development · Level 3

Languages: Spanish native · English B2
